2021 RENTAL INDUSTRY WHOLESALE

SOURCE BOOK

- FOR THE EVENT RENTAL PROFESSIONAL-

Introduction

We are dedicated to developing, manufacturing and making readily available innovative products and solutions for the tent and event rental professional. Family owned and operated since 1991, we are also committed to providing first rate customer service at all times which includes treating those we serve with courtesy and respect, offering fair pricing, promptly responding to inquiries and listening to what our customers have to say. Our Rental Industry Sourcebook is a culmination of more than two decades of research and development to bring you the finest products available at an exclusive wholesale price only available to established business customers.

Our Mission

To be the world's leading resource for products that support, secure, accessorize, illuminate and renew tents.

General Policies

Price

Although we strive to maintain published pricing, Advantage Tent Fittings reserves the right to modify prices and terms when necessary, and without notice. Please confirm current price when ordering.

Minimum Order

A $25.00 minimum applies per shipment and does not include tax/shipping cost.

Credit Card Orders

We accept Visa, MasterCard, Discover and American Express.

General Credit Policy

Net 30 day payment terms are available subject to credit approval A credit application is required for new accounts and for existing accounts that would like to increase their credit limit. A 3% processing fee will be added to invoices that are billed Net 30 days and paid by credit card after date of shipment.

Custom Orders

Custom orders are available through an Advantage customer service representative. Special pricing and product availability will be determined at the time of order placement. All custom orders must be prepaid in advance of production and are non-refundable.

Sales Tax

Orders shipping within the state of Ohio are subject to local prevailing sales tax rate unless a valid tax exempt or resale certificate is submitted and approved.

Shipping

It is the responsibility of the buyer to verify receipt of shipped goods and to make sure the order is complete and undamaged. Claims for incomplete shipments must be made to Advantage Customer Service within five days of deliver. Claims for goods damaged during transport will not be accepted if the damage was not clearly notated on the delivery documentation. Parcel and LTL Freight costs are prepaid and added to invoice unless other arrangements are requested. Product may occasionally ship directly from our supply chain partners. All provided ship dates are estimates only and subject to change.

Return Policy

All return claims must be filed within 14 days of receiving goods. To obtain a RMA number please call toll free 1-866-813-4501. RMA certificates must be displayed on all returned merchandise or merchandise will be refused. Any returned merchandise that is not deemed to be Advantage's responsibility will be subject to a 15% restocking fee and must be returned with prepaid freight.

Limited Warranty

Advantage Tent Fittings warrants that all products included in this catalog will be free from manufacturer defects at the time of shipment; however, the warranty length does vary by product type. Please contact our sales department for details regarding the warranty length for a specific product. This warranty is limited to product replacement or refund of the original purchase price and does not cover normal wear and tear and damage caused by shipping, product alteration, improper installation and other conditions beyond our control. Because we have no control over the ultimate end use of our products, in no event shall Advantage Tent Fittings be held liable for any personal or financial loss, injury,

Three easy ways to order...

• **Call** Toll Free 1-866-813-4501 (1-740-773-3015)

• **Fax** your Order to 1-740-773-8371

• **E-mail** your Order to: sales@advantagetent.com

If you wish to pay by credit card, please do not include credit card information with e-mail orders, we will promptly call you to obtain billing information.

We are standing by to serve you: Mon-Fri, 8AM-5PM E.S.T.

Table of Contents

Assembled with Pride in USA

Many of the products within this catalog including all tent poles and sewn/heat sealed products are assembled with pride at our company owned factory in Southern Ohio. Other products are sourced domestically and globally to stringent quality standards and always with the tent and event rental professional in mind.

-Inquire for allowable loads. Allowable load calculations performed in accordance with AITC Timber Construction Manual, Section 4.4 Axially Loaded Members. Any provided load values are absolute with no added safety factor and applicable to ATF laminated wood tent poles only having the specifications listed on this page.

-Allowable load calculations assume vertical installation and vertical application of all loads with no load eccentricity, torsion or other imposed loads. Calculations also assume use in calm dry conditions for seven days or less and in sustained temperatures less than 100 degrees Fahrenheit. Any deviation from vertical installation or these assumed conditions may result in substantially reduced load capacities.

-Any provided allowable load capacities are based on the assumption that at both ends of pole, translation is fixed and rotation is allowed.

-To comply with AITC recommendations for slenderness ratio, pole lengths greater than 17' (4.5") and 18' (5.5") require a base plate capable of preventing both rotation and translation of the bottom end of the pole.

-All published data herein is intended as a reference guide only and is subject to change at any time without notice. It is the responsibility of the tent installer to determine ultimate suitability based on prevailing conditions at the job site.

Aluminum & Steel Tent Poles

1.75" Aluminum

Features:
• 1.75" Aluminum Tube
• Approx. .413 lbs. per foot
• Anodized Finish
• 1/2" Aluminum Pin
• Machined Resin Top & Bottom
• Swaged Multi-Piece Construction
• Secure Push Button Assembly
• Ideal for OTC rental kits

2" Schedule 40 Aluminum

Features:
• 2" Sched. 40 Aluminum
• 2.375" O.D.
• Approx. 1.264 lbs. per foot
• Anodized Finish
• 5/8" Aluminum Pin
• Machined Resin Top & Bottom
• Single or Multi-Piece Sections

2.375" Galvanized Steel

Features:
• 2.375" Galvanized Steel
• Approx. 1.605 lbs. per foot
• 16 Gauge - .065 Wall Thickness
• Triple Coat Corrosion Resistant Protection
• 5/8" Aluminum Pin
• Machined Resin Top & Bottom
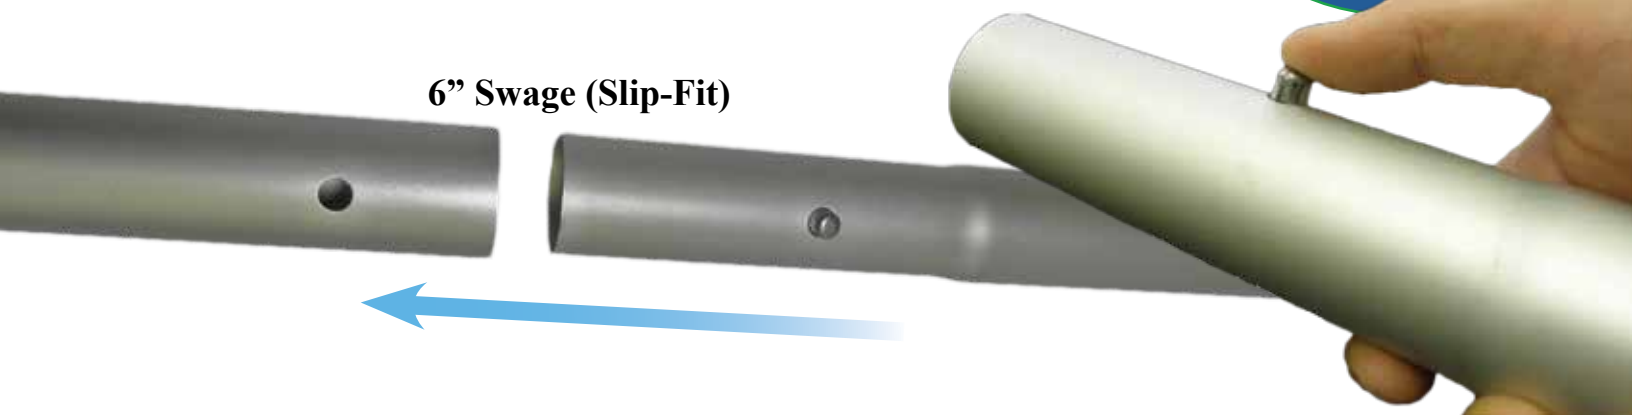

1.75" Anodized Aluminum

1.75" Aluminum tent poles are lightweight, corrosion resistant and available in multi-piece sections that are perfect for inclusion in over-the-counter (OTC) rental kits. Our anodizing process gives the poles an attractive finish and provides maximum corrosion resistance. In addition, our top assembly consists of a smooth radius resin material that is easy on your vinyl tent tops and will not rust. The multi-piece sections slip-fit together and lock in place with a strategically placed push button.

Protective Pole Sleeves

Our new center pole protective sleeves are the best way to protect your wood center poles from scratches, marring, dirt and incidental moisture while in transit to/from the job site and in storage. The sleeves are made of tightly woven nylon that resists incidental moisture and retains breathability. We also offer detached web strap assemblies that feature an easy grip handle which makes it much easier to distribute the weight of the pole across multiple installers. The sizes listed below are intended for use with ATF Engineered Wood Center Poles however custom diameters and lengths can be made by special order. Price is per linear foot.

Description	Product Code
4.5" Nylon Pole Sleeve	NPS4.5
5.5" Nylon Pole Sleeve	NPS5.5
Handle Assembly	NPS1INH

Not intended for protection against heavy/direct moisture. Follow manufacturer's handling and care instructions for engineered wood center poles. Do not exceed 50lbs. per handle strap assembly.

Aluminum Carabiner

Features
- Aircraft-quality 7000 series aluminum
- Symmetrical design prevents shifting
- Rope bearing surfaces are true radii - no flat spots
- Oval shape is great for multi-purpose use
- CE and UIAA certified

Description	Product Code
Aluminum Oval Carabiner	OPO6

Metal Rope Snap

This industrial grade metal Rope Snap makes it easier to fasten your guy-line assembly to the tent. Rated for up to 770 lb. working load limit.

Description	Product Code
Metal Rope Snap	MRS770

Metal Ring Cluster

This heavy duty ring assembly is made of 3/8" diameter zinc coated steel. The middle ring has an inside diameter of 1.25" and the four triangle rings accommodate 2" wide webbing. Working load limit = 2,000 lbs.

| Description	Product Code
Metal Ring Cluster	MRC2000

Brass Grommets & Repair Kit

Our setting tools are made from high grade tool steel for long and reliable service in the shop or out in the field. Other size grommets available by special order.

Description	Product Code

For use with steel stakes only.

Ratcheting Winch Plate

Use as a stand alone anchoring unit with double headed tent stakes or in conjunction with our steel stake bars for added holding power. Intended for use with 1" or 1-1/8" stake diameters. WLL = 3,333 lbs. See straps on pg. 18.

Description	Product Code
Ratcheting Winch Plate	WPR10K_R

Finish color may vary (gray or black)

JackJaw® Stake Extractor

JackJaw® Tent Stake Extractors are the new force in stake pulling. The powerful, patent pending jaw and lever mechanism allows you to pull tent stakes straight out of the ground or asphalt without bending the stakes. The sturdy lever arm gives you a 16 to 1 mechanical advantage. A 100 lb. down force on the handle generates a 1,600 lb. upward force and a 3,200 lb. gripping force on the stake. Tilted stakes? No problem! Just lean the JackJaw® to align with the stake. With the optional stake bar adapter (AC0009), the JackJaw® easily pulls stakes from stake bars or flat base plates.

JackJaw® Buyers Guide:
JJ0301 - Ideal for simple stake extractions, where the stake head is not flush against a surface.
JJ0302 - This puller can do simple extractions like the 301 described above, plus pull stakes that are pounded flush to a surface such as stake bars and plates. Recommended for use with AC0009 Adaptor.

Description	Product Code
JackJaw® Stake Extractor	JJ0301
JackJaw® W/Adjustable Base	JJ0302
Extractor Stake Adaptor	AC0009

JackJaw® 301 pulling angled stake

JackJaw® 302 in raised position with adapter

Lever Stake Puller

Features and Benefits:
• Easy to operate
• Removes all types of stakes
• Fast and efficient
• Weighs only 37 lbs.
• Cost effective
• Not intended to pull stakes driven flush to plate

Product Code 230

Drop-In Concrete Anchors

Our Drop-In Concrete Anchors feature an internally threaded, all-steel shell with expansion cone and are manufactured from zinc-plated carbon steel or stainless steel for continuous low temperature and long term applications. Drop-In Anchors should be installed with carbide tipped hammer drill bits made in accordance to ANSI B212.15-1994 specifications. For best results, use with ATF Eyebolts.

Drop-In Anchor Installation Steps:

Drill hole to required depth
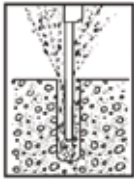

Clean hole w/ pressurized air

Drive Anchor flush w/surface

Expand Anchor w/ Setting Tool

Approvals/Listings
- Meets or exceeds U.S. Government G.S.A. Specification A-A-55614 Type 1
- Underwriters Laboratories
- Factory Mutual
- City of Los Angeles - #RR2748
- California State Fire Marshal
- Caltrans

Bolt Dia.	Drill Bit	Min. Depth	0° Tension Value	Anchor Code	Setting Tool Code
1/2"	5/8"	2"	5,840 lbs.	RL-12	RLST-12
5/8"	7/8"	2-1/2"	8,640 lbs.	RL-58	RLST-58
3/4"	1"	3-3/16"	9,480 lbs.	RL-34	RLST-34

Allowable load values based upon 4 to 1 safety factor and are applicable to 4,000 psi concrete installs only, divide tension value by 4 for allowable load values. Designed for vertical lifts only, angles greater than 0° may reduce the working load limit. Stainless Steel recommended for extreme low temperature and long term installations, please call for pricing & availability. Anchors remain in concrete.

ATF Eyebolts

Manufactured specifically for use with our Drop-In Anchors, simply match the Eyebolt diameter to the bolt diameter listed in the Drop-In table above.

Description	Product Code	0° Load Limit
1/2" Eyebolt	12EBEA	2,400 lbs.
5/8" Eyebolt	58EBEA	4,000 lbs.
3/4" Eyebolt	34EBEA	5,000 lbs.

Load limits applicable to 0° lifts only, angular lifts greater than 0° reduce the working load limit. Final anchor assembly only as strong as the weakest component. Stainless Steel recommended for extreme low temperature and long-term installations, Please call for pricing & availability.

DUCKBILL® EARTH ANCHORS

DUCKBILL anchors, a patented labor and time-saving device, work like a toggle bolt in soil. DUCKBILLS are driven into the ground (with no holes, no digging and no concrete), providing a safe and environmentally sensitive installation. An upward pull on the anchor tendon rotates the DUCKBILL into a perpendicular "anchor lock" position in undisturbed soil. The result: superb holding capacities. Steel drive stakes sold separately. See chart below for specifications and capacity limits.

1 Drive Anchor

2 Remove Driver

3 Pull Cable to Lock

4 Load Test if Desired
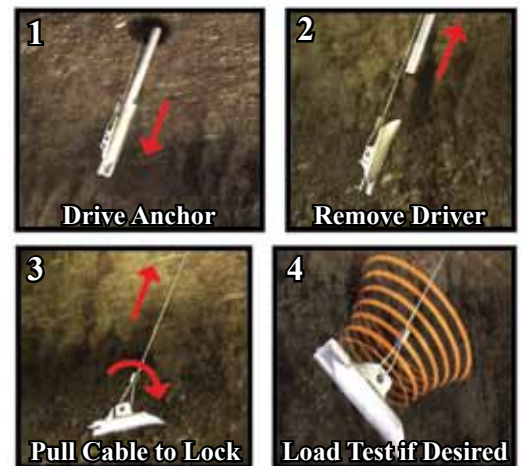

Description	Product Code	Rated Capacity
Aluminum Anchor w/2-1/2' of 1/8" Wire Rope	68DB1	1,100
3' Long Steel Drive w/Striking Head	DS-68	For Model 68DB1
Aluminum Anchor w/3-1/2' of 1/4" Wire Rope	88DB1	3,000

The end loop can be secured to rope or ratchet hardware.

Cleaning & Repair

Advantage Tent Cleaner

Works Great in multiple applications including:
Cleaning Tents • Office • Industrial • Household • Automobile

Don't let the name fool you! Use Advantage Tent Cleaner to clean carpet, furniture, pet stains, walls, boat interiors, convertible tops, and much more! Easily cleans tough stains including mildew, wine, rust, road tar, scuff marks, glue, ink, and many other tough stains common in the rental industry! Use it at home and at work!

Biodegradable Formula

Description	Product Code
Vinyl Cleaning Solution	VCLN5000

Rec. concentration per 1 QT. of Water: Light = 1 oz. Cleaner, Medium = 2 oz. Cleaner, Heavy = 3 oz. Cleaner

Contains biodegradable surfactants

Liquid Vinyl Patch

Advantage Liquid Vinyl Patch is the answer to repairing small vinyl pinholes! Each 4 oz. can includes a dauber applicator for easy field repairs. Be sure to keep some handy in your rental truck(s) for emergency "last minute" repairs.

Description	Product Code
4 oz. White Liquid Vinyl	ATFLV/COLOR

Standard Colors (actual color may vary slightly from catalog ink color)

- Clear & White
- Beige
- Yellow
- Red
- Marine Blue
- Dark Blue
- Kelly Green
- Forest Green
- Black

Tip! For repairing pinholes in blockout vinyl, apply a thin layer of black liquid vinyl patch first, allow it to dry, then apply a layer of white liquid vinyl patch to simulate the blockout material. A second layer of white might be required.

HH-66™ Vinyl Cement

A superior quality vinyl adhesive that really works!

- Exceptional Bond Strength
- Easy Application - Brushes smoothly & quickly
- Fast Drying - Ready in minutes
- Waterproof - Outstanding resistance to temperature and weather extremes, chemicals, oil, fuel, grease

HH-66 (1 QT.)	HH661QT
HH-66 (1 GL.)	HH661GL

Applicator brush included

White Vinyl Repair Tape

Developed specifically for the tent rental professional, our Vinyl Tape is a great solution for last minute job site repairs on vinyl tent tops and sidewalls. Featuring a top layer of premium white blockout vinyl and an adhesive backing that offers an excellent combination of high initial tack and adhesion. Simply clean the repair area, cut the patch to size, peel and stick! **Product Code: FP13OZB - 4" X 10' Roll**

Not intended to replace permanent repairs such as heat sealing and/or sewing, particularly in areas of the structure that experience a high degree of stress.

Cut to size

Peel

& Repair!

Translucent Vinyl Repair Tape

Tear-Aid® repair patch is made from an exceptionally tough, matte finish, abrasion resistant, translucent polyurethane elastomer that resists puncture and tearing. Tear-Aid® makes the perfect low-cost addition to any field repair kit. Recommended for repairing tears and cuts to clear sidewalls and french windows. Intended for use with vinyl and vinyl coated materials only.

Description	Product Code
3" X 5' Type B Bulk Roll	TA313

Leister™ Triac Tent Mender

The perfect solution for heavy duty repairs!

The Leister™ Triac creates a permanent weld between two pieces of vinyl. Simply cut a piece of material to overlap the damaged area. Heat the vinyl between the two pieces and exert constant pressure with the wide band roller. The finished repair is virtually invisible when using a matching material. The Leister™ Triac features an adjustable temperature control and is powered by 110 volts. Leister™ tools are guaranteed for 12 months against electrical or mechanical failure caused by defective material or workmanship, provided the failure is not the result of misuse.

Description	Product Code
Leister™ Triac	141.228
Wide Band Roller	HY-1000
40MM Nozzle	107.132

Nozzle and roller sold separately

Carrying Case included with each Triac Purchase!

Streamer Lighting

Features:
- SPT-2, 10 amp U.L. Listed Wire

"I wanted to thank you for my wonderful experience working with your company. From start to finish I can only compliment you on your service and product. I needed 150 lanterns for a high-profile wedding. You helped me with what I needed and guided me through the entire process. I would highly recommend your company!!"
Scott Levine, President

Entertainment Unlimited Events, Centerville, OH

Lantern Cord System Components

Whether you are looking to drop lanterns from the lace lines of a tent or simply string them between center poles, we offer all the components you need to create the perfect lantern cord!

Individual Components	Product Code
100' Roll SPT2 (10AMP) White Wire	SPT2W100FTW
White Female Quick Plug (12)	SPT2QPFW
White Female "In-Line" Quick Plug (12)	SPT2QPIW
White Male Quick Plug (12)	SPT2QPMW
7" Clear Cable Tie (Bag of 100)	7INCTB100
Intermediate Base Lamp Socket (40W)	216SK-731-2
Clear 40W Bulb (25)	203B40S11N/C
Frosted 40W Bulb (25)	203B40S11N/IF
White Electrical Tape (EA.)	PVCT/WHITE

Installation Suggestions:
Option 1: Create drops by connecting female outlets right onto the main wire. Ideal for variable length drops.
Option 2: Place Intermediate Base Pin Sockets right onto the main wire. Ideal for stringing lanterns between center poles or where varying length drops aren't required.

Cape Cod Style Onion Lanterns

Used on fishing vessels in the 1800's and later utilized for porch lighting, the iconic Onion Lantern has been an enduring light source for well over a century. We have taken this great American tradition and seamlessly retrofitted it for use within the tenting environment. The warm glow and rustic aesthetics create a welcoming environment inside of event tents. Available in a small and large size and in two different materials/finishes. The Bronzed version is made of Copper and the Aged Zinc version is made of Aluminum. The Center Pole Mount Set illustrated below accommodates a pole diameter range of 4.5" to 5.5". We also offer a side pole bracket kit for mounting the small lantern to 2.5" or 3.5" octagonal wood side poles. The lantern is ETL listed and conforms to ANSI/UL Standard 1598. Small rated for 75W and large rated for 100W. Bulb not included.

Center Pole Mount Kit
Includes two untreated pine wood panels, back plates and mounting hardware.

Side Pole Mount Kit
Interfaces with our PCS2 bracket located on page 40. Intended for use with small Onion Lantern only. Shown from back view of bracket.

Weighs 5 lbs.

Mason Jar Pendant With Cage

Add a rustic touch to your next tented event with our unique oversized Mason jar pendants. The pendants are 4½" dia. by 11¼" tall and include a heavy duty metal cage that protects the glass. The lid and cage feature a weathered red-brown finish. Rated for up to 60W light bulbs and illustrated with a 40 watt vintage bulb (*not included*). The open bottom and ventilation holes on top help to dissipate heat during use. The kit includes one brown 15½ foot cloth-covered lamp cord with switched socket and two cord clamps for adjusting the height of the lamp. Simply plug into any standard outlet with no hard wiring required. Extra brown wire and quick plugs available.

FlexiPAR

FlexiPAR is a high-tech alternative to standard PAR cans. Made of thick aluminum and includes 4 lenses to change the degree of flood: VNSP, NSP, MFL, WFL. Uses a super bright 575 watt, 3,200 Kelvin, lamp (sold separately). Includes hanging bracket, cord set and gel frame. High output and quick lens/beam change make the FlexiPAR a popular choice for a high output spotlight within the tent environment.

ATF PAR Mount Arms

The ATF PAR Mount is a cost effective, simple and streamlined way to mount PAR cans to center poles. Designed for use with our Lighting Arm Brackets found above, ATF PAR Mount includes one 3/8" and one 1/2" mounting hole on the front plate to accommodate a wide range of PAR light fixtures. The white powder coated finish blends seamlessly into the canopy top and provides for a professional and attractive looking installation. Each individual PAR mount rated for up to 25 lbs. Lighting Arm Bracket rated for up to four PAR cans and 100 lbs. evenly distributed total working weight limit. Sold individually, mounting bolts and nuts not included.

Description	Product Code
PAR Mount, White	PMAW

3/8" and 1/2" Mounting Holes and a Sturdy Mounting Surface make for fast and easy installs.

Decorative Lighting Arms

Features:
- Flat-bar steel construction
- Durable white powder coated finish
- Available in 20", 28" and 36" lengths
- Perfect for hanging chandeliers & party lanterns!

Indoor/Outdoor Extension Cords

Our 12/3 Outdoor Extension Cords feature a high visibility P.V.C. jacket that withstands rough use, chemicals, moisture, and ozone and provides added flexibility at below freezing temperatures. The molded-on non-slip plugs, available in single tap and triple tap, resist breaking or pulling off. Our white cords are best suited for applications with light backdrops such as white tent tops, sidewalls and white pole covers. For dark backdrops, such as pavement or grass, our 25' black single tap cord is ideal. The 10' molded on triple tap cord is a perfect power source for lighting clusters affixed to center poles. All of our extension cords are U.L. Listed and meet OSHA requirements. See the table below for a complete listing of our single and triple tap extension cord selection.

Description	Product Code
25' White 12/3 Single Tap	D14512025
